I think it would be good to put this off until we can have the small group white board you requested to talk about Bay Delta policy issues beyond BDCP, which Tim will work with Abi to schedule soon. Cynthia's desire for an "ask" of USFWS follows Ken's query a couple weeks ago about a possible Administrator "ask" of DOI.

I think it would be useful to have a call on this project also, to hear what the strategy is to address the issues and formulate an ask of the USFWS (Interior). How about if I set that up for end of this week? This is not to hear comments on the draft document, but to discuss bigger picture strategy so that we can move now to raise issues. OK?

Cynthia
